PROFESSIONAL SUMMARY

Versatile Software Engineer with 6+ years of full-stack experience building robust applications using PHP (Laravel) and modern JavaScript frameworks. Expert at converting complex product requirements into logical, well-performing software solutions. Adept at managing the full software development life cycle from initial system design and database architecture to deployment and performance optimization.

TECHNICAL SKILLS

- Languages: PHP (Laravel, CodeIgniter, Native), Python, JavaScript, HTML & CSS
- Frameworks/Libraries: Laravel, Vue.js, React.js, jQuery
- Databases: MySQL, Oracle DB, SQL Server
- Tools & Methodologies: Agile, OOP, Data Structures & Algorithms, Problem Solving, Kony Visualizer

PROFESSIONAL EXPERIENCE

OneXpand | Senior Software Engineer | Jan 2024 – Present

- Design and develop core logic for new web and mobile applications, ensuring alignment with product requirements.
- Lead the revamp and refactoring of existing applications to improve performance and maintainability.
- Converted customer and product requirements into logical and well-performing software applications.
- Utilize Agile principles to successfully track deliverables and boost development productivity.

Banque Du Caire | Senior Software Engineer | June 2022 – Aug 2024

- Architect and develop complex logic for financial web and mobile applications.
- Manage and mentor a team of junior developers, providing technical guidance and code reviews.

- Spearhead application refactoring projects to adapt to evolving banking security and performance standards.

Appcorp | Senior Software Engineer | Aug 2018 – Aug 2021

- Designed and developed logic for new web and mobile applications to meet business needs.
- Converted complex business and product requirements into well-performing, logical software applications.
- Successfully implemented Agile workflows to monitor project milestones and deliverables.

Brainwaves Systems Middle East | Junior Software Engineer | Mar 2017 – Aug 2018

- Defined customer requirements to build customized systems tailored to unique client needs.
- Resolved critical performance issues and improved software usability through rigorous error correction.

BuduCloud | Intern Software Engineer | Oct 2016 – Mar 2017

- Designed, developed, and deployed software solutions to address specific business needs.
- Debugged applications to resolve logical and programming issues during the development lifecycle.

Microsoft | App Factory Trainee | Apr 2014 – Apr 2015

- Designed and implemented Windows Store, Windows Phone, and Windows Universal Applications.

EDUCATION

B.S. in Computer Science | Misr International University
